Chapter 16

Issues in Covid-19 Pandemic

Debkumar Bhattacharya, Purbani Roy

Abstract:

The corona virus disease (covid-19) caused by SARS COV2, declared as pandemic by World Health Organization (WHO), was originated in Wuhan city of China. To control the situation, the Government of India imposed lockdown in most of the districts of 22 states and union territories from 2020 and it has been seen that the Government of India has claimed success in the fight against this pandemic with the help of lockdown. But this lockdown has raised different issues either positive or negative which impacted the whole world. The pandemic has raised different ethical issues that affected patients, health care providers as well as health care systems and people as well. Along with the health crisis the whole world is facing the economic and social crisis and affected the society from its core. Due to the pandemic the health system has faced challenge by the increasing number of demand for care of covid-19 patients. The impact of covid-19 pandemic has been largely disruptive in terms of economic activities on developing
